10. Mary Mata Technology started in 2003 as a DTH distribution and recharge service provider in Kerala. In a short span of time, Mary Mata Technology has become a leading recharge service provider in Kerala. With 20 years of experience and the trust and support from our customers, Mary Mata Technology has taken another major step by launching a new app with the aim of expanding our services across India. We are passionate about providing services with professionalism and quality. Mary Mata Technology has been integrated to implement strategic online services and solutions to meet customer needs, and provide endless revenue opportunities to our partners. Our mission is to accelerate the growth of online services in India. Now social media services have also been launched. For this, a mobile app called *_INFO91_* has been developed.

11. Unlike traditional messaging platforms, info 91 stands out as a unique chatting app service specifically designed for businesses and business groups. It includes all the standard features found in regular chat apps, but its primary focus is on group interaction. This unique app makes info91 an invaluable tool for marketing efforts and global message broadcasting through a single post.
